SUMMARY

Software Engineer experienced in building reliable backend systems, scalable web applications, and cloud-native services using JavaScript/TypeScript, Node.js, React, and GCP. Strong in API design, distributed debugging, CI/CD, and secure system development. Ranked Top 50 in TCS HackQuest for cybersecurity excellence. Passionate about high-reliability engineering, developer tools, and building systems end-to-end.

EDUCATION

May 2021 – Apr 2025
Visakhapatnam, India

B.Tech in Computer Science Engineering with specialization in Cybersecurity
Gandhi Institute of Technology and Management (GITAM)
8.42 CGPA

PROFESSIONAL EXPERIENCE

Jul 2025 – Present
Hyderabad, Telangana

Systems Engineer
Tata Consultancy Services, working for Lloyds Banking Group

- Built and maintained Node.js (Fastify) microservices powering secure banking workflows used by 300K+ customers.
- Implemented CI/CD pipelines (Jenkins + GCP Kubernetes) reducing deployment time by 30% and improving release reliability.
- Enhanced observability using logs/metrics tracing, improving incident resolution time by ~25%.
- Collaborated in Agile sprints to ship compliant, security-focused features for enterprise banking systems.

INTERSHIP EXPERIENCE

Feb 2025 – Jun 2025
Bengaluru, India

Packaged App Development Associate Intern
Accenture Solutions Private Ltd

- Worked on Workday's HCM suite to build and configure scalable HR business processes.
- Developed and deployed EIB integrations for automated data import/export using custom layouts and transformation logic.

Apr 2024 – Jul 2024

MERN Stack Web Developer Intern
AARSFS

- Developed web interfaces and backend APIs with a focus on **React.js** and Express.js.
- Debugged and fixed UI/UX bugs to enhance usability and performance.
- Worked in Agile sprints, actively participating in reviews and stand-ups.

Apr 2024 – Jun 2024
Bengaluru, India

MERN Stack Web Developer Intern
INVENSIS TECHNOLOGIES PRIVATE LIMITED

- Built and optimized full-stack web applications using MongoDB, Express.js, React, Angular, and Node.js.
- Worked on improvements of the Angular web applications.

Aug 2023 – Dec 2023
Visakhapatnam, India

Web Dev Intern
Farminno-Tech

- Built responsive web components using **React.js**, HTML, and CSS, ensuring cross-browser support.
- Collaborated with designers to implement mobile-first layouts and intuitive UIs.
- Optimized frontend performance.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C

Backend: Node.js, Express.js, Fastify.js, REST APIs

Frontend: React.js, HTML5, CSS3, Vite.js

Cloud & DevOps: GCP, Cloud Run, Kubernetes, Docker, Jenkins, CI/CD

Database: SQL, MongoDB

Cyber Security: OWASP, Burp Suite, Wireshark, Nmap

Tools: GitHub, Postman, Firebase, Workday, IPFS

PROJECTS

Clear Home Intel

Full-Stack Web Application | Vite.js, Node.js, Express, MongoDB, OpenAI API

- Designed and developed a full-stack document-analytics platform using React, Node.js, MongoDB, and OpenAI APIs.
- Built a scalable PDF ingestion pipeline that processed 1,000+ pages, generating structured insights via LLM-based analysis.
- Deployed backend on Cloud Run with containerized workflows, reducing API response latency by 25%.

Proxy Bazaar – Full Stack E-commerce Platform

Full-Stack Web Application | MongoDB, Express.js, React.js, Node.js (MERN Stack)

- Built a platform to buy and rent VPS, RDP, proxies, and AWS services.
- Designed responsive UI with React and secure APIs with Node.js and MongoDB.
- Integrated admin panel, referral codes, and payment gateway.

Mobile Wallet with Offline Payment Support

Android App | Kotlin, Node.js, Express, MongoDB

- Designed a desktop-like UI using WebView and mobile-native flow.
- Built secure sync logic between Android client and web backend with offline support.

Blockchain-Based Certificate Issuance System

- Designed a blockchain-based certificate system using Solidity & Ethereum, ensuring tamper-proof verification.
- Integrated Web3.js & IPFS for decentralized storage and authentication.

Real-Time Stock Market Dashboard

- Built a web app for real-time stock market data using the MERN stack.

LEADERSHIP

Team Leader – Final Year Project

- Led a team of 4 students in building a project that secured a Top 2 position at the college poster presentation event.
- Managed project design, development, and presentation, ensuring effective communication and project delivery.

Web Development Lead – IEEE CS Student Club, GITAM

- Led web development initiatives, coordinated cross-functional teams, and conducted technical workshops to enhance team collaboration and project timelines.

Web Development Team Member – ACM Student Club, GITAM

- Contributed to the development of the club's website, optimizing UI/UX and functionality to enhance the user experience.
- Assisted in organizing coding competitions and hackathons, improving engagement among peers.

ACHIEVEMENTS

Top 50, TCS HackQuest Season 9 (2025)

- Recognized for excellence in cybersecurity problem-solving at a national-level ethical hacking contest hosted by TCS.

Smart India Hackathon (SIH) Nomination (2023)

- Led a 6-member team in a national-level hackathon, applying agile methodologies to develop an innovative fintech solution.

3rd Place – Quantumania Coding Contest (2023)

- Secured 3rd place in a coding competition across three campuses at GITAM College.

Final Year Project Poster Presentation | Top 2 Position (2025)

- Led a team of 4 in presenting the final year project at the college-level poster competition, securing a Top 2 position.
